ABOUT AVOCCO

BRAND STORY

The brand name is derived from the Italian Arcobaleno Nuvola Picco, which means rainbow clouds winding peaks. The founder Sr.Roberto Maggini(1943-2017) has always had the dream of the shoes industry brand and cleverly combined these three word abbreviations to form the AVOCCO brand. Because it is deeply loved by consumers, its is often nicknamed "Eagel Head" brand by fans.

A vibrant outdoor event, likely a festival or race, featuring a large crowd of people. In the foreground, a man with wet hair and a white t-shirt is smiling, looking down. To his left, a woman with long dark hair is seen from behind, wearing a green and yellow patterned top. The air is filled with a thick mist of yellow powder being thrown by participants. In the background, a red inflatable archway spans the street, with the text "DASI AVOCCO" printed on it. The scene is set under a clear blue sky with some trees and utility poles visible. A dark semi-transparent banner is overlaid on the left side of the image.
